

TWI Staff Resumé

Name: Sayee Raghunathan

Position: Technology Group Manager,
Manufacturing Support Group

Qualifications: BTech in Metallurgical Engineering (1994)
CEng, CertEWE, SenMWeldI, MIMMM, IWE, ASQ-CQE

Experience:

Since joining TWI, Sayee has been working on a wide range of projects relating to the development and application of arc welding process technology and welding engineering. Furthermore, he has been involved in a consultative capacity on resolving fabrication problems in power generation plant, structural steel work, pipelines and critical repair application involving bridges, offshore structures and pressure vessels. Sayee currently manages TWI's Manufacturing Support Group which includes Arc Welding Fabrication and Welding Engineering (AWFE) and Business Process Support (BPS) Sections. Sayee also has responsibility for managing TWI's welding engineering consultancy services.

Before joining TWI, Sayee has over 11 years professional experience as welding engineer in construction, fabrication and installation of offshore Oil & Gas facilities, installation of offshore pipelines and fabrication of pressure equipment. Experience has broadly been in the areas of:

- Project and fabrication (production) management.
- Business development.
- Customer relationship management.
- Quality management.
- Innovation and technology management.
